

TIGER EQUIPMENT

4 STROKE RAMMERS

Tiger rammers are easy to operate with plenty of power and exceptional balance. This combination increases productivity and dramatically reduces operator fatigue.

Each model features a powerful Honda 4 Stroke engine that lubricates through the crankcase instead of a mixed fuel burn. This eliminates the need for pre-mix, and reduces much of the carbon build-up that is so common with 2 cycle engines.

Tiger rammers are excellent for firm compaction of most cohesive and mixed soils.

Tiger ProRam 4 Stroke rammers are truly the choice of professionals.

POWERED by
HONDA

UV resistant poly tank eliminates corrosion problems

Honda power and reliability

Integrated recoil guard provides protection during operation and transport

Reinforced leg provides exceptional balance and stability

Engine protection with integrated lifting point

Heavy-duty bellows

Steel reinforced laminated wood foot withstands repeated stress
